

GREEN GRAPH500

Torsten Hoefler

University of Illinois at Urbana-Champaign
and ETH Zürich

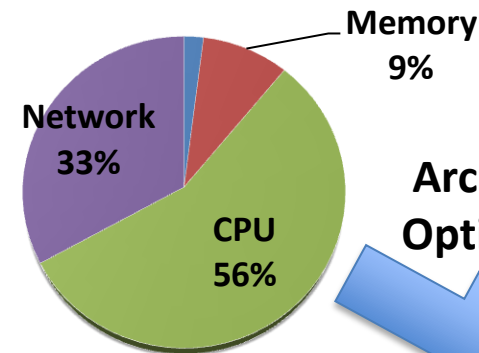

Talk at ISC'12, Hamburg, Germany

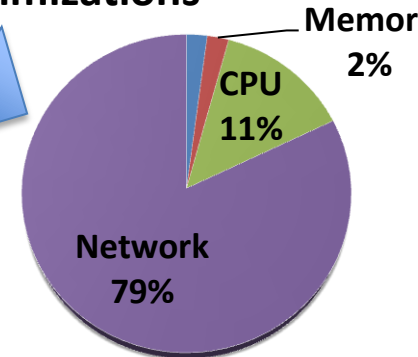

With support of David Bader, Andrew Lumsdaine, Richard Murphy, and Marc Snir

MOTIVATION

Architectural Optimizations

- Big Data analysis may dominate datacenter cost
 - Encourage vendors to provide “greener” hardware

Hoefler: “Energy-aware Software Development for Massive-Scale Systems”, EnA-HPC Keynote 2011

WHY NOT JUST GREEN500?

- Green500 is centered around HPL
 - HPL: extremely structured, FP/Cache intensive
 - Graph500: unstructured, no good separators, (main) memory and network intensive

- Completely different optimization goals!
 - Need to be addressed by vendors!
 - Maybe specialized machines?

REAL COMPARATIVE MEASUREMENTS

REAL COMPARATIVE MEASUREMENTS

A SECOND DETAILED POWER TRACE

>3 MTEPS/W measured on BG/Q

Scale=34

Thanks to (IBM): Fabrizio Petrini, Yutaka Sugawara, George Chiu, Paul Coteus, Fabio Checconi, James Sexton, Michael Rosenfield, Gerard V Kopcsay

THE GREEN GRAPH500 LIST

THE GREEN GRAPH500 LIST

- In close collaboration with Graph500 (same rules)
 - Will have a separate list and separate awards
 - <http://green.graph500.org/>
- Measurement techniques compatible with established practice and Green500
 - Allows comparisons and cross-analyses
 - Only real measurements, no TDP etc.

PROCEDURES & TECHNICALITIES

- Report used energy for full solution
 - Metric: TEPS/Average Power [TEPS/W] or [TEPJ]
 - Test system: ~75 kTEPS/W vs. 452 MFLOPS/W
- Count power for compute nodes and network
 - Either measure single node and switch and sum
 - Or measure cumulative power (at inlet)
 - Or any combination of those (rack ...)
- PUE is irrelevant for the benchmark

THE FUTURE OF THE LIST

THE FUTURE OF THE LIST

- First List: Supercomputing 2012
 - Submission deadline: aligned with Graph500
- Submission details:
 - Through Graph500, provide output data and energy information, or power trace
 - May run different (smaller?) problem sizes
- Watch <http://green.graph500.org/>

- Support:

- Thanks to David Bader, Andrew Lumsdaine, Richard Murphy, and Marc Snir
